

JENISH CHOVIYA

Software Development Engineer II and Team Leader

+91 7621988173 | jenishchovatiya186@gmail.com | [LinkedIn](#) | [GitHub](#) | Surat

PROFESSIONAL SUMMARY

4+ years MERN/Next.js web developer and SDE II leading UI delivery of scalable, user-centric applications. Expert in React, TypeScript, Next.js, Node.js, Express, and MongoDB with AWS/DigitalOcean deployments. Strong in API design, real-time features, CI/CD, and mentoring to ship clean, maintainable code.

TECHNICAL SKILLS

Programming Languages: C, Java, JavaScript, TypeScript

Frameworks: Next.js, Express.js

Frontend: HTML, CSS, Bootstrap, React.js

Backend: Node.js

Tools: Visual Studio Code, Git, GitHub

Databases: MongoDB

Platforms: AWS, DigitalOcean

Library: React.js, Socket.io, Agora.io, Whereby, Zoom SDK

Others: Solana (SOL)

PROFESSIONAL EXPERIENCE (4+ YEARS)

Software Development Engineer II and Team Leader | Dec 2023 - Jul 2025

Infyni | Gurgaon

- Led the UI team to deliver scalable frontends using Next.js and TypeScript; established **design systems** and coding standards.
- Owned feature delivery end-to-end with product and backend partners; accelerated releases by **~25%** through clearer roadmaps, improved sprint planning, and dependency management.
- Optimized client performance via code-splitting, image optimization, and caching strategies, improving **Core Web Vitals by ~30%**.
- Implemented **CI/CD pipelines** with GitLab to standardize testing and deployments and reduce release risk.
- Mentored **4 engineers** via 1:1s, pair programming, and structured code reviews, reducing defects by **~25%** and improving overall code quality.
- Instituted monitoring and error boundaries to improve system reliability, achieving **~99.8% uptime** during peak usage.
- Spearheaded cross-functional feature delivery with product and backend teams, contributing to **~18% user signup growth within 3 months** and expanding platform adoption.

Technologies Used: Next.js, React.js, TypeScript, Node.js, Express.js, MongoDB, GitLab, AWS

Senior MERN Stack Developer and Team Leader | Jun 2021 - Nov 2023

Xitij Infotech | Surat

- Designed RESTful APIs and admin panels for social and live-streaming products; owned **schema design** and data modeling.
- Improved API throughput through database query optimization and Redis caching, reducing response times by **~40%**.
- Integrated **payment gateways** and video/streaming SDKs; implemented secure webhooks and RBAC.
- Facilitated sprint planning, backlog estimations, and cross-team code reviews, improving on-time delivery of features by **~20–25%**.
- Deployed services on **AWS and DigitalOcean** with automated backups and monitoring, increasing system availability to **~99.8%**.
- Established linting rules, automated tests, and structured PR checklists, reducing production incidents by **~30%**.
- Led a major feature revamp that increased onboarding signups by **~28% within six weeks**, improving user adoption and platform engagement.

Technologies Used: Node.js, Express.js, React.js, MongoDB, Socket.io, Stripe, Razorpay, AWS, DigitalOcean, GitHub

Web Developer | Dec 2020 - May 2021

Codely Infotech | Surat

- Applied HTML, CSS, JavaScript, and Bootstrap to build **responsive UI components** under guidance.
- Used **Git workflows**, performed basic reviews, and contributed to **issue triage** in team repositories.
- Developed simple REST endpoints and frontend features, delivering **40+ tasks and bug fixes to production**.
- Practiced unit testing and debugging techniques, reducing rework and minor defects by **~15%**.
- Optimized frontend rendering by implementing **code-splitting and lazy loading**, reducing initial load time by **~40%** and improving perceived performance across devices.
- Implemented onboarding improvements and streamlined the signup flow, increasing **new user signups by ~12% within three months**.
- Refactored selected API endpoints and introduced **in-memory caching**, enabling the system to support **~5x peak traffic** while maintaining **~99.9% availability**.

Technologies Used: HTML, CSS, JavaScript, Bootstrap, Git, Visual Studio Code

PROJECTS

TTYO – Native Video Chat App | Xitij Infotech

A native video chat app enabling random matching, private calls, livestreams, chat, and wallet/withdrawals. Built with Node.js, React.js, Socket.io, Agora.io, and MongoDB; deployed on DigitalOcean with Google Play and Stripe integrations.

- Engineered the **end-to-end backend and admin panel**, supporting **1,500+ concurrent sessions** and reducing call setup latency by **~35%** through optimized signaling and connection handling.
- Integrated **Google Play and Stripe payment flows**, automating wallet settlements and payout processes, saving **~8 hours/week of manual operational work**.

MegaChart – US Stock Market Analysis Platform | Freelance

Investor-focused analytics web app with real-time and historical stock data via FMP; implemented Redis caching and full AWS deployment (EC2, S3) with CI/CD.

- Delivered the **full-stack application independently**, increasing API throughput by **~50%** using Redis caching and reducing page latency by **~1.5 seconds**.
- Implemented **automated CI/CD pipelines and AWS infrastructure setup**, reducing release time by **~65%** and enabling faster feature deployment.

Rayzi – Web-based Social Media App | Xitij Infotech

Social platform with livestreaming, video calling, chat, wallets, and withdrawals. Backend and admin built on Node.js, React.js, Socket.io, Agora.io, and MongoDB; deployed on AWS with Stripe/Google Play.

- Implemented **real-time livestreaming and chat infrastructure**, enabling **1,000+ simultaneous streams** and reducing session drop-offs by **~20%** through improved connection handling and latency optimization.
- Built **wallet and payout pipelines** with secure webhook processing and automated reconciliation, achieving **~99.6% payment success rate** while reducing chargebacks by **~15%**.

Infyni – Web Application | Infyni

A live online learning platform offering personalized, expert-led classes with real-time messaging and video sessions; stack included Next.js, TypeScript, Socket.io, Zoom/Whereby, Razorpay, and Stripe with CI/CD.

- Led **UI development using Next.js and TypeScript**, improving classroom engagement by **~22%** through UX enhancements, optimized layouts, and smoother real-time interactions.
- Integrated **video conferencing (Zoom/Whereby) and real-time messaging**, and established CI/CD pipelines, shortening feature **go-live cycles by ~3 days**.

EDUCATION

Bachelor of Engineering - Computer Engineering | *June 2022*

Government Engineering College of Modasa | *Modasa*

Higher Secondary Certificate | *May 2018*

Shree Swaminarayan Gurukul Vidhyalay | *Surat*

ACHIEVEMENTS

- Recognized as Star Employee of the Year (2022–2023) at Xitij Infotech for exceptional performance and valuable contributions to the team.
-

ADDITIONAL HIGHLIGHTS

- Contributed to 10+ additional projects featuring advanced livestream capabilities, including audio rooms, multi-host live sessions, and interactive real-time features.
